

Northwest Community Schools

Summary

Northwest Community School District (NWCS) had an outdated ERP system that required a lot of manual work was costing the district time and money, holding them back from reaching department and district goals. When it came time to replace the dated software, Skyward's Qmlativ helped NWCS save \$100,000 per year and four days of processing with streamlined business processes.

Benefits at a glance

- Designed specifically for school business offices
- Quick implementation
- Many training resources
- Paperless options, made easy
- Significant time and money savings

Michigan | **Implemented:** 2022 | **Schools:** 5
Enrollment: 3,550 | **Product:** Qmlativ Business

The biggest place we see time and money savings is for our payroll processor; it's absolutely mind-blowing to me. We have eliminated almost all paper timesheets, which used to take the person in that role almost four days to complete. Now, we have our payroll submitted by Tuesday afternoon. Payroll duties are now handled in less time by fewer people. With salary and benefits, we are looking at \$100,000 in savings in our department every single year — that's huge.
