

5 Ways to Plant the Seeds of Sustainability

Reduce, reuse, recycle

Boost kids' enthusiasm about helping the Earth.

- Start in the classroom.
- Make recycling bins available next to every trash can.
- Hold an end-of-year collection for unwanted supplies.
- Take steps to reduce classroom waste.

Implement more paperless processes

Save trees by using:

- Family Access
- LMS & OneRoster API license
- Online forms
- Cloud storage (ISCorp)
- Electronic payments

Use tech as an exploratory tool

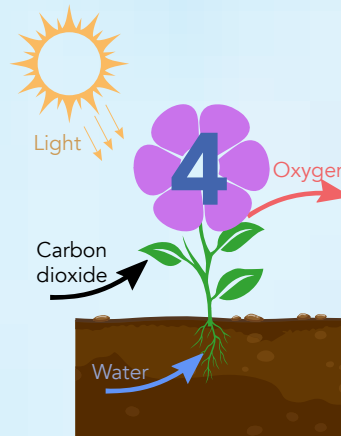

- Livestreams let students get close to nature.
- Apps teach kids about animals or help them identify species in nature.
- Virtual reality allows kids to explore otherwise unreachable locations.

Harness the power of the sun

Using solar energy is good for:

- The environment
- School budgets
- Budding environmental stewards

Plant a school garden

Planting a school garden teaches environmental responsibility.
It's also a lot of fun!
